EDUCATION

Bachelor of Engineering (B.E)
SPPU University
2021-2025
(Currently persuing)

HSC board (12th)
SPVN Shardanagar
2019-2021
(Completed with 79.00%)

SSC board (10th)
SPVN Shardanagar
2019
(Completed with 81.40%)

TECHNICAL SKILLS

- C++
- Python
- Django
- SQL
- HTML/CSS
- Solidity
- MONGO DB
- PANDAS
- NUMPY

PROJECTS

Organic food testing and it's traceability using Blockchain:
It basically serves as a forum for farmers to sell their organic food products. Technology will assist farmers in selling goods at a fair price.

Android Weather Applications:
With the use of the open weather map API, we developed an android application that displays the current weather.

E-commerce using Django:
With the aid of Django and using SQLite as a database, we were able to develop an e-commerce website. Bootstrap was utilized for the front end.

Face recognition:
I developed an attendance system that employs facial recognition, and this project logs attendance in a csv file using the openCV algorithm.

Voice Assistant:
We utilized Python to develop a voice assistant, and the sapi 5 voice recognition system and Google's speech recognition technology were both used to recognize speech.

Land registry using Blockchain:
We are now developing a blockchain-based land registration platform that will be used to register land and keep all documents connected to land on the network, and we have chosen to use flutter for it.

COMPITITIONS

- Navdhara 2k22 project competition (2nd prize)
- Cretechnova 2k23 project competition (2nd prize)
- Technovation 2k23 (7th rank)
- Avishkar 2k23 (1st prize)(Law domain)
- Avishkar 2k23 (2nd prize)(Agriculture domain)
- Internal Smart India Hackathon 2023(1 st prize)
- Avishkar 2k23 (2nd prize zonal level)(Agri domain)
- Avishkar 2k23 (3rd prize zonal level)(Law domain)
